HEATING INSTRUCTION

We use dual ovenable, self venting, cool to touch trays with easy pull film!

MICROWAVE HEATING – for average 850w microwave

Step One – Remove the band and place the tray in the microwave. DO NOT lift the film or puncture the film. For FROZEN meals, defrost first for best results.

Step Two – Microwave on HIGH for 4 minutes or 6-8 minutes if its frozen. The film expands to make a steam tent. It vents to release steam and then de-flates.

Step Three – Remove from the microwave and leave for 2 minutes. Peel back the film – Protect yourself from a steam burn. Pull the film back toward you!

OVEN HEATING INSTRUCTIONS (gives best result)

- Pre heat the oven to 180C
- Remove film
- Heat for approximately 20-25min or until piping hot.
